1 Brief description of use case

2 How the datasets fulfill the requirements

2.1 Schema and basic profile of each dataset

Table 1: Datasets

Dataset	Entities	Attributes	Data Format
Drugs@FDA	[Count]	[Count]	CSV
EMA Medicines	[Count]	[Count]	Excel
Wikidata	[Count]	[Count]	JSON/XML

2.2 Integrated schema and overlap with input schemata

Table 2: Attribute Intersection with Integrated Schema

Integrated Attribute	Drugs@FDA	EMA Medicines	Wikidata
Active Substance Name	X	X	X
[Attribute 2]	[X]	[X]	[X]
[Attribute 3]	[X]	[X]	[X]
[Attribute 4]	[X]	[X]	[X]
[Attribute 5 (Must share!)]	[X]	[X]	[X]
[List Attribute (e.g. Brands)]	[X]	[X]	[X]

2.3 Why enough entities are likely contained in multiple datasets
